NexOptic Selected to Demonstrate Technology to General Dynamics Mission Systems–Canada

Company's First Technology Demonstration in the Defense Sector

Vancouver, Canada – April 24, 2018 - NexOptic Technology Corp. ("NexOptic") (OTCQX: NXOPF) (TSX VENTURE: NXO) (FRANKFURT: E3O1) (BERLIN: E3O1) is pleased to announce that it applied, was selected and demonstrated its technology for General Dynamics Mission Systems–Canada Small and Medium Enterprise/Business Initiative. NexOptic was one of two SMEs selected to integrate its technology over the General Dynamics' Future Tactical Network ("FTN") – a secure LTE network designed for use in emergency and defense operations.

Using its proof of concept prototype containing the original, and patented, Blade Optics™ lens design (see Company press release from February 21, 2017 for further details), NexOptic demonstrated video feeds through the secure network from a field reconnaissance position displaying a target approximately 13km away. The initiative was held at the Calgary General Dynamics facility and led to multiple demonstrations for General Dynamics' clients. The demonstration utilized General Dynamics' Future Tactical Network, which allows for secure LTE & Wi-Fi communication between vehicles, command centers and headquarters, as well as allowing non-secure traffic to be broadcasted without affecting the secure channels.

John Daugela, CEO of NexOptic, stated, *"We are grateful for the opportunity General Dynamics provided our team in showing members of the defense industry potential use-cases for our technology in a new sector."* Mr. Daugela continued: *"Utilizing General Dynamics' Future Tactical Network, we showed strong compatibility with our proof of concept and demonstrated its usefulness in acquiring targets at long range without the need for a deep lens stack. I believe our novel proof of concept prototype integrated very well with General Dynamics' Future Tactical Network by allowing for long range image sharing across an innovative platform."*

About NexOptic Technology Corp.

NexOptic is a creative optical development company which aims to enhance the way we view the world around us. Currently focused on engineering its first consumer product for the growing outdoor recreation market, as well as a demonstration prototype for the mobile device space, NexOptic is aggressively pursuing a multi-pronged optical innovation strategy. Utilizing Blade Optics™, the Company's developing suite of innovative optical technologies, NexOptic aims to increase aperture sizes within given depth constraints of various imaging applications. Increasing the aperture size enables a lens system to have an improved diffraction limit, thus providing the potential for increased resolution capabilities.

Blade Optics™ refers to NexOptic's lens designs, algorithms and mechanics which vary from patented, patent-pending and includes all of the Company's intellectual property and know-how.

NexOptic trades on the OTCQX under the symbol "NXOPF," on the TSX Venture as "NXO," on Frankfurt as "E3O1" and Berlin as "E3O1." More information is available at www.nexoptic.com.

Forward-Looking Statements

This press release contains forward-looking information and forward-looking statements within the meaning of applicable securities laws, including, but not limited to, statements with respect to expectations concerning the development of its technology, new products and designs, the potential applications of the Company's technologies and its potential markets. The reader is cautioned that forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other factors which are difficult to predict and that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Forward-looking statements are based on the then current expectations, beliefs, assumptions, estimates and forecasts about the business and the industry and markets in which the Company operates and are qualified in their entirety by the inherent risks and uncertainties surrounding future expectations, including, among others: risks commonly associated with the development of new technologies, including that the Company's technology is at an early stage and additional work will be required to confirm potential applications and feasibility of its technologies; the Company may not be able complete the prototypes and designs as currently expected; potential applications of the Company's technology are based on limited studies and may not be representative of the broader market; the risk that prototypes and designs may not achieve expected results; the Company may not be able to commercialize its technology; the Company may not have access to necessary financing on acceptable terms or at all; and other risks inherent with the patent process, transactions of this type and the business of the Company. Such forward-looking statements should therefore be construed in light of such factors. Other than in accordance with its legal or regulatory obligations, the Company is not under any obligation and it expressly disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.
